

# Boils, carbuncles, lumps, cysts, pus accumulations, abscesses, etc

On the outside of the body you would:

- 🧠 Begin with **skin brushing** around affected area if you can tolerate it
- 🧠 Secondly do **Hot/Cold** for 20-30 minutes
- 🧠 Then apply any tincture needed such as **Triple Tincture**
- 🧠 Rub **Deep Tissue Heating Salve** into area or around area
- 🧠 Apply **Black Super Draw** to cover entire area with a 2 inch margin around it; leave on for 4-6 hours and remove.
  - 🧠 How to: Spread a thin layer of Black Super Draw on a larger piece of Plastic wrap than the size that you would want for the BSD coverage. Flip it over with herb side down on the skin and plastic on top to keep it moist. either tape it with breathable tape or wrap around body part with more plastic wrap.
  - 🧠 Remember that BSD can be kept in the refrigerator for up to three months if no contamination or molding occurs. So mix up enough to last you for a few days and it take the work out of it.
- 🧠 Do this procedure at least twice per day until well.
  - 🧠 The affected area may open up and drain pus, blood, or other junk, but let it do it. Keep up the poulticing and the procedure until healing takes place.

Hemorrhoids, swellings, pus pockets, fistulas, tumors inside the rectum:

- 🧠 Fill a large vegan capsule with a good grade of non-expanding **Bentonite Clay**
- 🧠 Coat the capsule in **Deep Tissue Heating Salve** and insert it into the rectum
- 🧠 Walk around a little bit to let your backside cool down; this can take up to 15 minutes
- 🧠 Using an **Rectal Syringe** insert 1 cup warm water with 1 Tablespoonful of **Fulvic Acid Minerals**
- 🧠 In place of water you could substitute **Blood Lymph Detox Formula; or Triple Tincture; or any other tea; and Chlorophyll.**
- 🧠 Make up some really soft **Black Super Draw** that can be inserted into the rectal vault using a turkey baster or large syringe, or enema bulb syringe. Do this at least three to four times a day.
- 🧠 Person needs to be taking Triple Tincture at boosting doses three times per day until well
